

## Outdoor TAP 8 Way

### Key Features -

- Compatible with various dB values: 10, 14, 17, 20, 23dB.
  - Support a variety of plug-in conditioners (\*) for signal conditioning.
  - SMT technology for superior quality and reliability.
  - A360 aluminium alloy housing with weather-resistant protective powder coating.
  - All F ports meet ANSI/SCTE 01 2006.
  - Pressure test at 15psi for 60 seconds under water.
  - Blocking capacitor withstands 1KV power surge on F-port.
  - AC/RF bypass device providing RF/Power continuity when remove faceplate during installation.
  - Patented 360° 4 prong strong holding force seizure.
  - Distortion best solution:
    - 1.Hum modulation at 12 A, 5 ~ 1000MHz: >70dB.
    - 2.Inter modulation on all F ports >105dB.
    - 3.2nd harmonics on all F ports >110dB.
  - Power passing: 12A, 60/90VAC, 60Hz.
  - RFI >100dB
-
